

Note

The following summary Table, produced daily, provides traffic trend information derived from a small sample set of traffic counters located on the national road network.

The information below covers the morning period from 7am until 10am. The trend for car traffic from this period of the day generally correlates closely with the overall daily trend in car traffic at each location.

Introductory Remarks

- Traffic figures are measured from 7am to 10am so as to provide an early indicator each day.
- Weekly heavy goods vehicle traffic has remained largely stable and accordingly the daily figures provided are for cars only.
- The changes recorded day-to-day are not cumulative – they compare only the current day's figures versus the same day in the previous week, the same day last year and with the same day prior to the introduction of Level 3 restrictions on 7th October (i.e. Wed 30th Sept to Tues 6th Oct).
- Initial restrictions were put in place on Monday 30th March 2020. Countrywide Level 5 restrictions were in place from Friday 30th October to Wednesday 30th December and were reintroduced on 31st December 2020.

Daily Data for Tuesday 14th September

- Overall, this morning's traffic volumes show an increase as compared to those one week previous, Tuesday 7th September 2021, and a substantial increase as compared to Traffic volumes before the introduction of Level 3 restrictions in October of 2020.
- Car traffic just south of the Northern Ireland Border on the N1 at Jonesboro shows a +1% increase as compared with Tuesday 7th September and a +23% increase since the start of the October Level 3 restrictions.
- In the case of the non-motorway border counter sites, traffic volumes today show changes of between -7% and +6% as compared with Tuesday 7th September. The changes in car traffic volumes since the application of October Level 3 restrictions ranges from -33% on the N16 west of Manorhamilton to +16% on the N2 north of Monaghan. It should be noted that traffic volumes at the N2, N3, N14, N15 and N16 counters are lower than at the motorway traffic counters and are likely to display wider fluctuations in traffic figures than other traffic counters.
- Traffic volumes on the radial routes into Dublin, comparisons with Tuesday 7th September are as follows: +5% on the M1 at M50 to Airport, +8% on the N7 at Citywest, +2% on the M11 at Bray and +3% on the M4 at Celbridge-Maynooth. Comparisons with the same day prior to the start of the October Level 3 restrictions are as follows: +15% on the M1 at M50 to Airport, +11% on the M11 at Bray, +12% on the M4 at Celbridge-Maynooth, and +15% on the N7 at Citywest.
- The M50 (N3 Navan Road to N4 Galway Road) shows a +13% increase as compared with Tuesday 7th September, this increase is likely to be associated with reduced traffic volumes on the 7th due to an incident that occurred on the M50, and a +17% increase as compared with pre-Level 3 traffic. The comparison with the same day in 2020 has been excluded as the data for that site was incomplete on that day.
- In the case of the regional cities the changes in car traffic volumes this morning as compared with Tuesday 7th September are as follows: N6 Bóthar na dTreabh Galway -3%, N40 Cork -1%, M9 Waterford +1%, and M7 Limerick -2%. Comparisons with the same day prior to the start of the October Level 3 restrictions are as follows: N6 Bóthar na dTreabh Galway -1%, N40 Cork +3%, M9 Waterford +4% and M7 Limerick +13%.
